Generative AI Utilization Guidelines (for Students)

Basic Policy

KIC is a graduate school that aims to solve social issues utilizing ICT. Therefore, we expect students to use generative AI effectively such as ChatGPT as necessary. However, please use it appropriately under your own responsibility and judgment.

Facilitating Creativity and Learning

Generative AI is a tool to support efficiency in learning and research, but it is not an end in itself. Do not just use the output of the generative AI as it is, but be creative by explaining it in your own words and adding your own perspectives and insights. Also, please try to use generative AI to grow yourself as a tool to improve your own Tankyu practice skills, such as deepening your thoughts through dialogue with generative AI.

Checking Sources and Evaluating Reliability

Information obtained from the generative AI is for reference only and its accuracy is not necessarily guaranteed. Before using information provided by generative AI, please verify the source and evaluate its reliability. Check the validity of the information by comparing it with other reliable sources and expert opinions.

Ensure Privacy and Security

When using generative AI, please pay sufficient attention to the protection of personal and confidential information. Please do not provide sensitive information to generative AI, and take appropriate security measures when storing and sharing results.

Self-Responsibility and Ethical Use

When using generative AI, please use it appropriately and at your own risk. It is important not to infringe on the intellectual property rights or copyrights of others, and to follow the ethical standards of academic research. Please be careful not to fabricate, falsify, or plagiarize, which constitute "research misconduct."

Please refer to these guidelines and use generative AI for your own learning and research as necessary, paying close attention to effectiveness and safety. Always keep in mind ethical perspectives and academic integrity in your research activities.
